## Gigabit Ethernet Stand

### Flexible Gigabit Ethernet Connectivity for Mitel IP Phones

The Mitel® Gigabit Ethernet Stand delivers the latest technology and advancements in Gigabit Ethernet connectivity for Mitel IP phones. This unique peripheral device enables Mitel IP phones to operate in a Gigabit Ethernet environment, without having to change out the phone. This gives all compatible Mitel IP phones the ability to migrate as the customer's network evolves, thereby providing capital investment protection. There's no longer any need to change out the phones for more expensive models in order to get gigabit connectivity at the desktop!

The Gigabit Ethernet Stand allows computers connected to IP phones to access Gigabit services over the network. Ideal for users with high bandwidth requirements such as healthcare workers transferring MRI or X-ray information between buildings or even cities, enabling faster diagnosis and consultation among doctors. In education, Gigabit connectivity enables distance learning through video, while globally located engineering companies and professional service firms can collaborate over video links or share CAD/CAM files.

#### Provides Gigabit Ethernet Compatibility

The Gigabit Ethernet Stand allows Mitel IP phones to operate in a 10 / 100 / 1000 Mbits Ethernet (GigE) LAN environment, and allows unconstrained Gigabit Ethernet bandwidth from the network to the desktops.

#### Cost Effective Migration Protects Your VoIP Investment

As an enterprise's network bandwidth requirements evolve, Mitel IP phones can migrate to Gigabit connectivity to continue to quickly bring network data and applications to users. By being able to easily add the Gigabit Ethernet Stand to existing phones, network evolution becomes more cost effective.

#### Works Across Multiple IP Phones

Unlike competitive offerings, the Gigabit Ethernet Stand is an add-on peripheral that enables a range of the Mitel IP phones to be Gigabit compatible, as opposed to only one model.

#### Installs Easily

The Gigabit Ethernet Stand easily snaps on and plugs into the back of the Mitel IP phone, replacing the regular stand that ships with the IP phone. It requires no additional ports, licenses or software options, and takes up no additional space on your desk.

## Features

- Gigabit Ethernet Stand addresses the requirements of customers with higher bandwidth needs at the desktop
- Enables Mitel IP phones to operate in a GbE LAN (10 / 100 / 1000 Mb) environment
- Dual Port 100 / 1000baseT built into a phone base that attaches easily to existing Mitel IP phones provides capital investment protection
- Stand format easily attaches to Mitel IP phones, leaving the module slot free for use with Programmable Key Modules, the Line Interface Module, or the IP Conference Module
- Provides three ports: a Gigabit Ethernet LAN port to connect to the Gigabit Switch, a Gigabit Ethernet PC port and a 10 / 100 MB Ethernet connection to the IP phone
- Supported across a range of IP desktop devices for greater choice for your customers: 5215/5220 IP Phones (dual mode), 5212, 5224, 5235, 5330, 5340 IP Phones

## Powering Options

Supports IEEE 802.3af Power over Ethernet  
Optional 48VDC universal power adapter available (purchased separately)

## System Requirements

Mitel 3300 IP Communications Platform (ICP),  
Release 6.1 (UR2)

Mitel SX-200 IP Communications Platform (ICP),  
Release 3.0 (UR2)
