

MITEL NETWORKS

## 6000 | Managed Application Server

As a small business owner, you understand the importance of a communication network that is both well connected and secure. We understand it too: The Mitel Networks™ 6000 Managed Application Server (MAS) provides everything you need to streamline and enhance business communications in one, easy-to-use, reliable, cost-effective package.

### Small Business Need

Keeping employees connected in the office, at home or on the road is key to how small businesses prosper. The challenge is to find a solution that provides comprehensive and secure computer networking and Internet capabilities – a solution that's sized, packaged and priced to meet your requirements.

### Mitel Networks' Response

The Mitel Networks 6000 MAS responds to the needs of your information-intensive small business by connecting all of your computers, giving your company a secure link to the Internet, providing local and remote e-mail and file management services to all of your users, and letting you host and protect your own web site, intranet and extranets.

### Small Business Benefits

The 6000 MAS is available either as a standalone managed server or as an enhancement to one of Mitel Networks' leading edge voice communications solutions. The 6000 MAS can easily grow to accommodate new users and features, and can be managed locally or remotely via a simplified web-based control panel.

it's about **YOU**

Feature	Description	Benefit
Fast, Easy Setup	Plug-and-play simplicity and seamless integration with Microsoft® Windows® and Macintosh® computers.	Sets up in minutes. Remote office or multiple locations are easily available through the VPN.
Compact Size	Internet gateway and firewall, file and print sharing, e-mail and web services plus advanced network and security applications – all in one easy-to-use package.	Easy installation, browser-based management and single-vendor service all reduce the cost of initial implementation and ongoing maintenance. Compact size saves on office space.
Complete E-mail Service	Create and manage your own e-mail system, with webmail access for mobile employees. Antivirus service automatically protects against the latest Internet viruses and worms. Guaranteed e-mail service ensures you never lose incoming mail, even when your connection goes down.	Helps your employees work faster and more productively by providing access to files and e-mail from anywhere in the world via the Internet.
Secure Web Services	A powerful, secure web server lets you host your own Internet, intranet and extranet sites. Automatic domain registration and company-specific URL enhance your company image. Content-filtering service allows you to block employee access to inappropriate or unapproved web sites.	Improves customer access to your products and services, extends your reach and improves market opportunities.
Robust File and Print Capabilities	Create individual and shared directories for all of your users.	Save time and money by sharing printers and by managing, protecting and backing up your company's files and information to a secure, central server.
Enhanced Security	A sophisticated firewall to protect your data and network from intruders. For added peace of mind, our 24x7 monitoring service helps ensure that your network, web site and services are always available.	Built-in security, proven reliability and round-the-clock surveillance let you focus on running your business, not on running your network.
Investment Protection	Smooth, cost-effective migration path to latest hardware and software releases	Unlike a server appliance, the 6000 MAS is capable of growing with your business to support new features, applications and users. Runs on industry-standard IBM xSeries 300 server hardware, so upgrades are easy and affordable. Intelligent Evolution ensures your system remains current and your investments protected.
