3340 | Branch Office Solution

Working at a branch office shouldn't mean having to settle for unsophisticated or less integrated communications than your colleagues at head office. Nor should it mean having to incur public network charges every time you need to talk to them. Branch office users need solutions that allow them to access and manage all of their communications effectively and productively. As well, branch office managers require solutions that let their operations mesh seamlessly, reliably and cost-effectively with headquarters. The Mitel® 3340 Branch Office Solution is the answer.

Powerful Communications for Branch Office Users

The 3340 Branch Office Solution delivers the full power of integrated IP-based communications to branch office users, giving them the same access to the following advanced, unified applications enjoyed by their colleagues at head office:

- feature-rich telephony
- multimedia collaboration
- speech-enabled applications
- unified messaging
- device integration
- mobility solutions
- contact center solutions
- teleworker solutions
- 802.11 and IP DECT wireless

Seamless, Cost-effective, Reliable Communications

The 3340 Branch Office Solution connects with a head office Mitel 3300 Integrated Communications Platform (ICP) via the corporate wide area network (WAN). This provides for a seamless, centrally managed IP communications network that enables colleagues to communicate between head office and branch offices as if at the same location – while eliminating long distance charges. And should the corporate WAN experience problems, the 3340 Branch Office Solution provides full survivability, full features, applications, and call routing, ensuring no calls are lost.

An Evolutionary Step Toward IP

For organizations considering IP communications but reluctant to make the transition at head office, the 3340 Branch Office Solution supports the full range of circuit-switched networking in addition to IP networking. This means organizations can evolve toward IP at branch office locations and make the move at head office when they're ready.

Simplified Access for Users Across the Branch Office

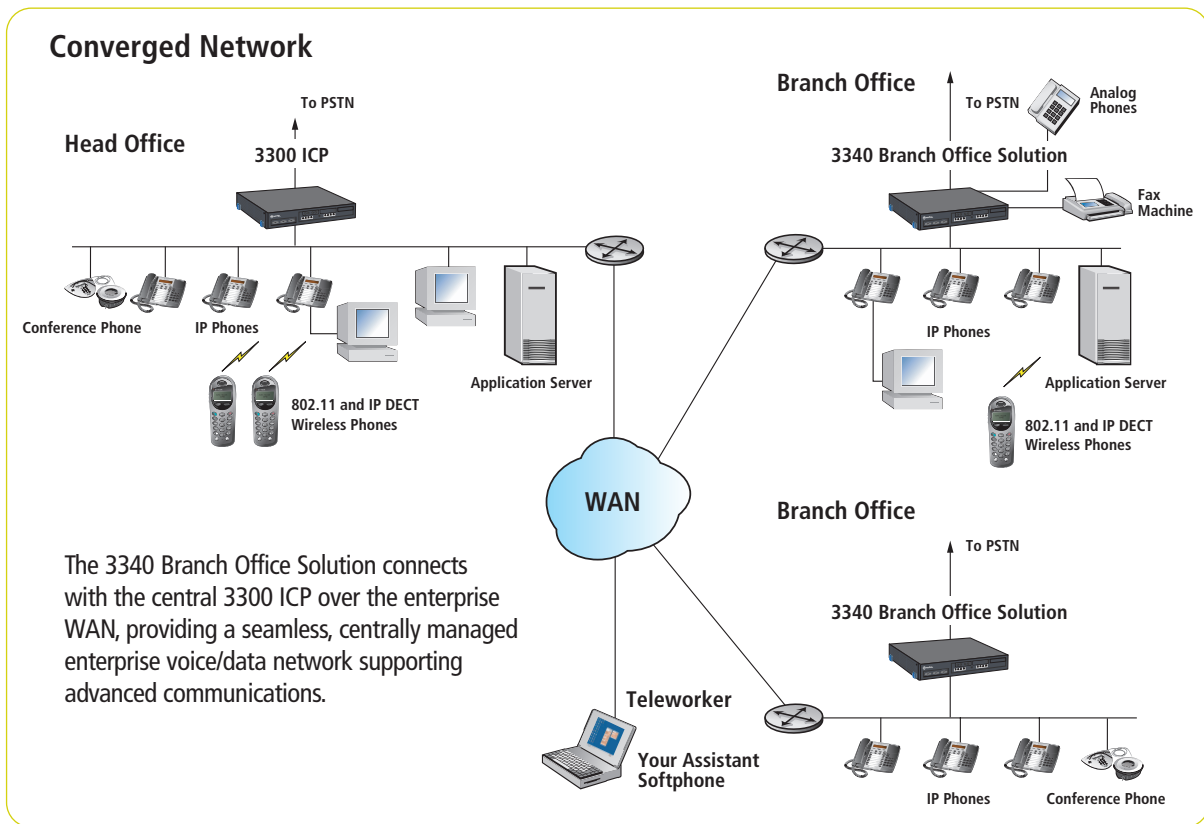

The advanced communications supported by the 3340 Branch Office Solution are all easily accessible via the Mitel portfolio of IP phones, appliances and desktop interfaces. From the management suite to the shop floor, these devices give branch office users access to the specific tools they need to do their jobs, while supporting unprecedented personal control over business communications and collaboration. In addition to supporting Mitel in-building mobility conferencing and collaboration solutions, the 3340 Branch Office Solution provides complete support for the Mitel Teleworker Solution enabling remote and home-based users to enjoy as-if-at-the-office access to communications, colleagues and resources.

it's about **YOU**

Mitel 3340 Branch Office Solution

- Reduced total cost of ownership
- Mobility solutions including teleworker, hot desking, 802.11 and IP DECT wireless
