Putting the "Demo" in Demo Room

Loyal readers (and those that have yet to pick a side) are aware of the big, big, expansion we are making in our business portfolio and offerings. When Owner and President **Scott Langdon** makes improvements, he goes all in! As such, our Meridian offices have been a construction site. However; with well-placed drop cloths and towels stuffed under door jambs, business carried on without interruptions with the exception of our main demo room being taken off-line. Once this is finished, it will be a thing to behold! We can't wait to show it off later this fall. Until then keep those calls and e-mails coming! Construction dust will never stop us - but it is hell on the carpets.

New Design Concept – floating fixtures

Departmental Meetings are rather short

With work being done on the inside, what better time to enjoy the great out-of-door at the **DataTel Summer Party and Water Balloon Skirmish!** Yes, there was food, fun, and frontal attacks by swarms of squealing kids and whooping adults as the balloons flew.

Every business is going to have its special requirements. One of the strengths of the **Mitel** communications offerings is specific design focus for the segment the solution is crafted. As an example – privacy is an absolute within the medical community so PCI and HIPAA compliancy *must* exist in everything the phone and storage of data touches. Mitel solutions attend to exactly that.

- Medical and Health Services
- Governmental and Social Agencies
- Education
- Hospitality
- Contact Centers

These are examples of segments for which Mitel provides dedicated teams, solutions, and pricing structures that are in alignment with that particular "segment" of service. And as a premier partner with Mitel for over 35 years, DataTel will professionally provide the support and guidance needed for the best possible outcome.

...and lastly

In a busy season of charity events and outings supporting our epic customers, there came the rainy day in Portland, OR when Jim Pace's umbrella was (literally) eclipsed by that of Kevin Noall – IT manager from Touchmark.
